EDITORIAL

Mathematics is a base of all sciences . From ancient period to 21st Century Indian mathematician has contributed very important role in Mathematics. Through this issue we are trying to give information about some Indian mathematicians and their contribution.

This publication is mainly the efforts of students of science faculty. An editorial team of students worked consistently in making this issue presentable. The Faculty members try to inculcate skills among the students by promoting various activities and this is one platform which would be very useful to the students and faculty as a whole to develop their research reading and writing skills .

We are thankful to our Principal Dr. Sanjay Kharat ,the staff members of Mathematics Department and students in making this endeavour successful. We wish to publish this circular every year making it more research oriented and innovative .
