**Name of Program: Master of Science (Data Science)**

### *Introduction:*

M.Sc. (Data Science) is a Two Year Full Time Post Graduate Program. A Master of Science in Data Science is an interdisciplinary degree program designed to provide studies in scientific methods, processes, and systems to extract knowledge or insights from data in various forms, either structured or unstructured, similar to data mining. Our curriculum provides students with a rigorous course of study in big data technologies, applications and practices, a pathway for student internships and full-time employment. Students are prepared to meet the challenges at the intersection between big data, business analytics, and other emerging fields like Artificial intelligence, Deep learning, Neural networks etc.

### *Program Structure:*

- The Program is a Two Year (Four semesters) Full Time Degree Program.
- The Program shall be based on a credit system comprising 88 credits.

### *Objectives:*

- 1) To expose and provide a strong foundation to the students in the upcoming era of Data Science and Artificial Intelligence
- 2) The programme aims at providing a rigorous training in fundamental concepts of Statistics, Mathematics, & Computers Science which creates a strong knowledge base in Data Science domain.
- 3) To provide a complete understanding of the subject by introducing projects from the Second semester on the relevant subject.
- 4) Focus on blending theory with practical and industry application to enhance understanding and learning.
- 5) Focus on the overall development of the students to help gain knowledge and skillsets required for further studies after completion of the course.

### *Eligibility Criteria:*

- Graduate degree in Statistics / Mathematics / Computer Science / Computer Application/ Engineering / Technology or any other discipline with a minimum of two years of learning Mathematics or statistics from a recognized university / institution with an equivalent qualification.
- English Language Proficiency.
- Intake: 30 Seats

**Medium of Instruction: English**

**Instructions for Teachers for Internal Evaluation for 20 Marks and 40 Marks:**

The purpose of internal evaluation is to assess the depth of knowledge, understanding and awareness. For this purpose, a teacher is expected to use different evaluation methods in order to have rational and objective assessment of the learners and available resources.

**External Examination:**

There will be a written Examination of 30 marks in 2 hrs. duration and 60 marks of 3 hrs. for every course at the end of each Semester only for major and Elective subjects.

*Award of Class:*

| Letter Grade      | Grade Point |
|-------------------|-------------|
| O (outstanding)   | 10          |
| A+ (Excellent)    | 9           |
| A (Very good)     | 8           |
| B+ (Good)         | 7           |
| B (Above average) | 6           |
| C (Average)       | 5           |
| P (Pass)          | 4           |
| F (Fail)          | 0           |
| Ab (Absent)       | 0           |

Question Paper Pattern:CIE

| <b>Max. Marks: 20 (Credit:02, Duration: 50 Min.)</b> |                                  |                             |                                   |                             |
|--|----------------------------------|-----------------------------|-----------------------------------|-----------------------------|
| <b>Question No.</b>                                  | <b>Question</b>                  | <b>No. of sub questions</b> | <b>Marks to each sub question</b> | <b>Total Question Marks</b> |
| 1  | Multiple Choice Questions 5      | 5                           | 1                                 | 5                           |
| 2  | Define any 5                     | 6                           | 1                                 | 5                           |
| 3  | Attempt any two of the following | 3                           | 2                                 | 4                           |
| 4  | Attempt any two of the following | 3                           | 3                                 | 6                           |
| <b>Total Marks:</b>                                  |                                  |                             |                                   | <b>20</b>                   |

| <b>Max. Marks: 20 (Credit 4, Duration: 50Min.)</b> |                                  |                             |                                   |                             |
|--|----------------------------------|-----------------------------|-----------------------------------|-----------------------------|
| <b>Question No.</b>                                | <b>Question</b>                  | <b>No. of sub questions</b> | <b>Marks to each sub question</b> | <b>Total Question Marks</b> |
| 1  | Multiple Choice Questions 5      | 5                           | 1                                 | 5                           |
| 2  | Define any 5                     | 6                           | 1                                 | 5                           |
| 3  | Attempt any two of the following | 3                           | 2                                 | 4                           |
| 4  | Attempt any two of the following | 3                           | 3                                 | 6                           |
| <b>Total Marks:</b>                                |                                  |                             |                                   | <b>20</b>                   |

For 2 credits CIE 20 Marks for internal Examination and 20 Marks for CBCS activity (Open book test, Seminars, Online Test, Surprise Test, Preparation of Models, Group Discussions etc.) average of 40 marks will be considered.

## M.Sc. Data Science Curriculum & Syllabus

### Programme Specific Outcomes (PSOs)

*After the successful completion of M.Sc. Data Science program the students are expected to*

|             |  |
|-------------|--|
| <b>PSO1</b> | Understand fundamental concepts in statistics, mathematics and Computer Science.                     |
| <b>PSO2</b> | Apply and use various analysis tools and software used in data science                               |
| <b>PSO3</b> | Perform laboratory-oriented problem solving and be capable in data visualization and interpretation. |
| <b>PSO4</b> | provide solutions particular domain specific problems by having in depth domain knowledge.           |
| <b>PSO5</b> | Utilize the data science theories for societal and environmental concerns.                           |

### Programme Outcomes (POs)

*On successful completion of the M.Sc. Data Science students will be able to*

|            |   |
|------------|---|
| <b>PO1</b> | Engage in continuous reflective learning in the context of technology and scientific advancement and in various subjects like mathematics, statistics, and data science   |
| <b>PO2</b> | Develop mathematical & Statistical models and their computational solutions to reason and interpret Big data in wide range of domains   |
| <b>PO3</b> | Acquire the skills in handling data science programming tools towards problem solving and solution analysis for domain specific problems.   |
| <b>PO4</b> | Develop scalable techniques for data analysis and decision making in many areas, including machine learning, algorithms, statistics, operations research, databases, complexity analysis, visualization, and privacy and security |
| <b>PO5</b> | Innovation and Entrepreneurship: Produce innovative IT solutions and services based on global needs and trends.   |

*First  
Semester*

| <b>Semester- I</b>   |   |                           |  |
|--|---|---------------------------|--|
| <b>Course Type: Major Paper1 (Theory)</b>  |   |                           |  |
| <b>Course Code: DSC51101 Course Title: - Machine Learning</b>  |   |                           |  |
| <b>Teaching Scheme:<br/>4 Hours / Week</b>   | <b>No. of Credits: 4</b>  | <b>No of Lectures: 60</b> | <b>Examination Scheme:<br/>CIE: 40 Marks ESE: 60 Marks</b> |
| <b>Prerequisites: Student should have basic knowledge of:</b>  |   |                           |  |
| <ul style="list-style-type: none"> <li>• Familiarity with Probability Theory, Multivariable Calculus, Linear Algebra</li> <li>• Programming in Python (NumPy, SciPy, Pandas, Matplotlib, Seaborn, SciKit-Learn, Statistics Model, Tensor Flow)</li> </ul>  |   |                           |  |
| <b>The main objectives of this course are to:</b>  |   |                           |  |
| <ul style="list-style-type: none"> <li>• To introduce students to the basic concepts and techniques of Data Mining and Data Warehousing and Machine Learning.</li> <li>• To study machine algorithms for solving practical problems.</li> <li>• To write python programs using machine learning algorithms for solving practical problems</li> </ul> |   |                           |  |
| <b>Expected Course Outcomes:</b>   |   |                           |  |
| <b>On the successful completion of the course, student will be able to:</b>  |   |                           |  |
| C01  | Identify the key processes of data mining, data warehousing and knowledge discovery and machine learning.   | B1,                       |  |
| C02  | Design data warehouse with dimensional modeling and apply OLAP operations   | B2, B6                    |  |
| C03  | To introduce knowledge of machine learning and Identify appropriate machine learning algorithms to solve real world problems  | B4,B5,B3                  |  |
| <b>B1 - Remember; B2 - Understand; B3 - Apply; B4 - Analyze; B5 - Evaluate;B6- Create</b>  |   |                           |  |
| UNIT   | Contents  | No of Lectures            | CO targeted  |
| <b>1</b>   | <b>Introduction to Machine Learning .</b> <ul style="list-style-type: none"> <li>• Concepts of Data Science</li> <li>• Machine Learning</li> <li>• Why learn and what is learning?</li> <li>• What is Machine Learning?</li> <li>• Traditional Programming Vs. Machine Learning</li> <li>• Machine Learning Process</li> <li>• Types of Data</li> <li>• Key Elements of Machine Learning (Representation, Evaluation and Optimization)</li> <li>• Feature Selection techniques (filter and wrapper method).</li> <li>• Descriptive and Inferential Statistics: Probability, Normal Distribution,</li> <li>• Distance Measures (Euclidean and Manhattan), Correlation Techniques, Introduction to Hypothesis Testing.</li> <li>• Creating our own dataset, Importing the dataset, Handling Missing Data, Cross validation methods, Feature Scaling (Normalization and standardization).</li> </ul> | 10                        | C01  |

|   |   |    |         |
|---|---|----|---------|
|   | <ul style="list-style-type: none"> <li>• Type of Learning- Supervised, Unsupervised and Semi-Supervised Learning</li> </ul>   |    |         |
| 2 | <p><b>Introduction to Data Mining</b></p> <ul style="list-style-type: none"> <li>• Definition Data mining and difference between Data mining and SQL</li> <li>• Data Mining issues</li> <li>• Stages of the Data Mining Process (KDD)</li> <li>• Data Mining Techniques/Tasks</li> <li>• Knowledge Representation Methods</li> <li>• Applications of Data mining</li> <li>• Data Pre-processing <ul style="list-style-type: none"> <li>○ Data Cleaning</li> <li>○ Data Transformation</li> <li>○ Data Reduction</li> <li>○ Data Discretization</li> </ul> </li> </ul>   | 5  | C01     |
| 3 | <p><b>Introduction to Data Warehousing</b></p> <ul style="list-style-type: none"> <li>• Introduction to Data Warehouse</li> <li>• Data Warehouse Architecture and its components</li> <li>• Data Modeling with OLAP <ul style="list-style-type: none"> <li>○ Introduction</li> <li>○ Difference between OLTP and OLAP</li> <li>○ Data Mart</li> <li>○ Fact Table, Dimension Table, OLAP cube</li> <li>○ Different OLAP Operations</li> </ul> </li> <li>• Schema Design <ul style="list-style-type: none"> <li>○ Introduction</li> <li>○ Star and Snow-Flake Schema</li> </ul> </li> <li>• Introduction to Machine Learning</li> <li>• Introduction to Pattern Matching</li> <li>• Case study based on Schema Design</li> </ul>  | 10 | C01,C02 |
| 4 | <p><b>Supervised Machine Learning</b></p> <ul style="list-style-type: none"> <li>• Introduction to Supervised Machine Learning</li> <li>• Regression in Machine Learning: <ul style="list-style-type: none"> <li>○ Types of Regression Algorithms-Linear Regression, Polynomial.</li> <li>○ Evaluation methods for regression: MAE, RMSE, R-Square error</li> </ul> </li> <li>• Classification in ML: Classification Algorithms <ul style="list-style-type: none"> <li>○ Logistic Regression</li> <li>○ Decision Tree</li> <li>○ k-Nearest Neighbors</li> <li>○ Naive Bayes</li> <li>○ Support Vector Machines (SVM)</li> <li>○ Evaluation methods: Confusion matrix, precision, recall, F1-score, Accuracy, ROC-AUC curve,</li> </ul> </li> <li>• Advantages and Disadvantages of supervised ML</li> </ul> | 14 | C03     |

|   |   |    |     |
|---|---|----|-----|
| 5 | <p><b>Unsupervised Machine learning</b></p> <ul style="list-style-type: none"> <li>● Introduction to Unsupervised Learning <ul style="list-style-type: none"> <li>○ Clustering Methods</li> <li>○ Density-Based Methods</li> <li>○ Hierarchical-Based Methods</li> <li>○ Partitioning-Based Methods</li> <li>○ Grid-Based Methods</li> </ul> </li> <li>● Clustering Algorithms <ul style="list-style-type: none"> <li>○ K-means clustering</li> <li>○ Hierarchical Clustering (Agglomerative, Divisive), Dendrogram</li> <li>○ Selecting optimal number of clusters: Within Clusters Sum of Squares (WCSS) by Elbow Method, Silhouette Score</li> </ul> </li> <li>● Introduction to Association rules <ul style="list-style-type: none"> <li>○ Association Algorithms- Apriori Algorithm</li> <li>○ Dimensionality Reduction – Singular value decomposition, Principle Component Analysis(PCA)</li> </ul> </li> <li>● Anomaly detection (outlier detection)</li> <li>● Independent Component Analysis</li> <li>● Advantages and Disadvantages of Unsupervised ML</li> </ul> | 14 | C03 |
| 6 | <p><b>Ensemble Learning</b></p> <ul style="list-style-type: none"> <li>● Model Combination Schemes</li> <li>● Bagging: Random Forest Trees</li> <li>● Boosting: Adaboost, Gradient boost</li> <li>● Voting</li> <li>● Stacking</li> <li>● Error-Correcting Output Codes</li> <li>● Gaussian mixture models</li> <li>● The Expectation-Maximization (EM) Algorithm</li> </ul>  | 7  | C03 |

|  |
|--|
| <ul style="list-style-type: none"> <li>• Enable students to undertake independent research of a business problem, and to analyze and present their findings.</li> <li>• Familiarize students with the basic techniques of collection, analysis, interpretation and presentation of data.</li> <li>• Formulate a research proposal for a business project.</li> <li>• Obtain Knowledge of research Methodology</li> </ul> |
|--|

**Expected Course Outcomes:**

**On the successful completion of the course, student will be able to:**

|     |  |        |
|-----|--|--------|
| CO1 | Understand research terminology & be aware of the ethical principles of research, ethical challenges and approval processes. | B1,B2  |
| CO2 | Identify the components of a literature review process   | B3     |
| CO3 | Describe quantitative, qualitative and mixed methods approaches to research  | B3,B4  |
| CO4 | Critically analyze published research  | B5, B6 |

**B1 - Remember; B2 - Understand; B3 - Apply; B4 - Analyze; B5 - Evaluate; B6- Create**

| UNIT | Contents  | No of Lectures | CO targeted |
|------|---|----------------|-------------|
| 1    | <p><b>Introduction</b></p> <ul style="list-style-type: none"> <li>• Introduction to Research: Definition, meaning,</li> <li>• characteristics of Research</li> <li>• Types of Research,</li> <li>• Introduction Nature of qualitative and quantitative research</li> <li>• Research in functional areas of management</li> <li>• Process of Research</li> <li>• Formulation of Research Design</li> </ul>   | 2              | CO1         |
| 2    | <p><b>Literature Review</b></p> <ul style="list-style-type: none"> <li>• Meaning and sources of Research problem, characteristics of good Research problem, Research process, outcomes,</li> <li>• Application of Research</li> <li>• Literature Review Process – Role, importance, sources,</li> <li>• methods, software tools for literature review.</li> <li>• Formulation of Research Problem</li> <li>• Meaning, Need, Types of research</li> <li>• Research design – Exploratory, Descriptive, components of research design and features of good research design.</li> </ul> | 3              | CO2         |
| 3    | <p><b>Sampling &amp; Data Collection</b></p> <ul style="list-style-type: none"> <li>• Sampling: Sampling design: Meaning, logic and application of sampling.</li> <li>• Data Collection Methods: Types and Sources of Data</li> <li>• Data Analysis: Organization and presentation of data, Data Analysis Methods</li> </ul>  | 2              | CO2,C03     |
| 4    | <p><b>Presentation and Publication of Research</b></p> <ul style="list-style-type: none"> <li>• Research Proposal, Research Paper, Research Thesis, Research Report, Report Writing, Format for writing reports</li> <li>• bibliography, and references</li> </ul>  | 3              | CO4         |

### Semester- I

Course Type: RM (Practical)

Course Code: DSC51308 Course Title: - Practical based on Research Methodology

|                                    |                   |                          |  |
|------------------------------------|-------------------|--------------------------|--|
| Teaching Scheme:<br>2 Hours / Week | No. of Credits: 2 | No. of Practicals:<br>10 | Examination Scheme:<br>CIE: 20 Marks ESE: 30 Marks |
|------------------------------------|-------------------|--------------------------|--|

Prerequisites: Student should have basic knowledge of:

| <ul style="list-style-type: none"> <li>• Problem solving Skills &amp; Basic knowledge of Computer Science Subjects</li> </ul> |  |                |             |
|---|--|----------------|-------------|
| <b>The main objectives of this course are to:</b>   |  |                |             |
| <ul style="list-style-type: none"> <li>• To enable students to publish research paper</li> </ul>                              |  |                |             |
| <b>Expected Course Outcomes:</b>  |  |                |             |
| <b>On the successful completion of the course, student will be able to:</b>   |  |                |             |
| C01   | Understand research terminology  | B1,B2          |             |
| C02   | publish research paper/ research article   | B3,B4          |             |
| <b>B1 - Remember; B2 - Understand; B3 - Apply; B4 - Analyze; B5 - Evaluate; B6- Create</b>                                    |  |                |             |
| UNIT  | Contents   | No of Sessions | CO targeted |
| 1   | <ul style="list-style-type: none"> <li>• ICT Tools for Research</li> <li>• Use of Internet in Research: Browsing the internet through standard features, Accessing and Downloading information,</li> <li>• E-resources for research, Impact Factor: E - Information, H- Index, citation index, , e-journals etc</li> </ul> | 3              | C01,C02     |
| 2   | <ul style="list-style-type: none"> <li>• Identification of Research Problem and Literature Survey</li> <li>• Various Referencing Styles</li> </ul>   | 3              | C01,C02     |
| 3   | <ul style="list-style-type: none"> <li>• Publishing a research paper</li> </ul>  | 4              | Co1, C02    |

*Second  
Semester*

| <b>Semester- II</b>  |  |                               |   |
|--|--|-------------------------------|---|
| <b>Course Type: Major Mandatory Paper 1(Theory)</b>  |  |                               |   |
| <b>Course Code: DSCS52101 Course Title: - Database Technologies</b>  |  |                               |   |
| <b>Teaching Scheme:</b><br>4 Hours / Week  | <b>No. of Credits: 4</b>   | <b>No. of Lectures:</b><br>60 | <b>Examination Scheme:</b><br>CIE: 40 Marks ESE: 60 Marks |
| <b>Prerequisites: Student should have basic knowledge of:</b>  |  |                               |   |
| <ul style="list-style-type: none"> <li>• Knowledge of file system concepts</li> <li>• Strong foundation of Related database Concepts (Basic &amp; Advanced)</li> <li>• A firm foundation of any RDBMS package</li> </ul>   |  |                               |   |
| <b>The main objectives of this course are to:</b>  |  |                               |   |
| <ul style="list-style-type: none"> <li>• Provide an overview of the concept of NoSQL technology.</li> <li>• Make the student capable of making choice of what database technologies to use on their application needs</li> <li>• Provide an insight to the different types of NoSQL databases</li> </ul> |  |                               |   |
| <b>Expected Course Outcomes:</b>   |  |                               |   |
| <b>On the successful completion of the course, student will be able to:</b>  |  |                               |   |
| CO1  | Differentiate between RDBMS and NOSQL technologies   |                               | B2  |
| CO2  | Understand various NOSQL technologies, their need, and applications  |                               | B1  |
| CO3  | Learn new concepts of data modelling, clustering, polyglot persistence, Version stamps, map reduce, schema migrations  |                               | B3,B4   |
| <b>B1 - Remember; B2 - Understand; B3 - Apply; B4 - Analyze; B5 - Evaluate; B6- Create</b>   |  |                               |   |
| UNIT   | Contents   | No of Lectures                | CO targeted   |
| 1  | <b>Overview of DBMS &amp; NOSQL</b> <ul style="list-style-type: none"> <li>• RDBMS Overview</li> <li>• Transaction, ACID Properties,</li> <li>• Database recovery techniques, DB Failure</li> <li>• Why NoSQL?</li> <li>• The value of relational databases</li> <li>• Impedance mismatch</li> <li>• Attack of clusters</li> <li>• The emergence of NOSQL</li> </ul> | 8                             | CO1   |
| 2  | <b>Aggregate Data Models &amp; Distribution Models</b> <ul style="list-style-type: none"> <li>• Aggregates</li> <li>• Example of relations and aggregates</li> <li>• Single server</li> <li>• Sharding</li> <li>• Master slave replication</li> <li>• Peer to peer replication</li> <li>• Combining sharding and replication</li> </ul>                              | 8                             | CO2,CO3   |
| 3  | <b>Consistency</b> <ul style="list-style-type: none"> <li>• Update Consistency</li> <li>• Read Consistency</li> <li>• Relaxing Consistency</li> <li>• CAP theorem</li> <li>• Relaxing durability</li> <li>• Quorums</li> </ul>   | 8                             | CO3   |
| 4  | <b>Version stamps &amp; Map Reduce</b> <ul style="list-style-type: none"> <li>• Business &amp; System transactions</li> <li>• Version stamps on multiple nodes</li> </ul>  | 8                             | CO3   |

|          |   |    |     |
|----------|---|----|-----|
|          | <ul style="list-style-type: none"> <li>• Basic Map Reduce</li> <li>• Example of Map Reduce</li> </ul>   |    |     |
| <b>5</b> | <b>Schema Migrations &amp; Polyglot Persistence</b> <ul style="list-style-type: none"> <li>• Schema Changes</li> <li>• Schema changes in RDBMS</li> <li>• Schema changes in NOSQL databases <ul style="list-style-type: none"> <li>○ Incremental migration</li> <li>○ migrations in graph databases</li> <li>○ changing aggregate structure</li> </ul> </li> <li>• Polyglot Persistence (Multi model types)</li> <li>• Disparate data storage needs</li> <li>• polyglot data store usage</li> <li>• choosing right technology</li> <li>• Enterprise concerns with polyglot persistence</li> </ul> | 8  | CO3 |
| <b>6</b> | <b>Implementation with NOSQL databases</b> <ul style="list-style-type: none"> <li>• Document Databases (Mongodb)</li> <li>• Graph databases (Neo4j)</li> </ul>  | 20 | CO3 |

| <b>1</b>   | <ul style="list-style-type: none"> <li>• Database Practicals - Data Query Language(DQL) Statements</li> <li>• Data Query Language(DQL) Statements: (Select statement with</li> <li>• operations like Where clause, Order by, Logical operators,</li> <li>• Scalar functions and Aggregate functions)</li> <li>• Using Virtual Lab IIT Bombay <ul style="list-style-type: none"> <li>• <a href="http://vlabs.iitb.ac.in/vlabs-dev/labs/dblab/labs/index.php">http://vlabs.iitb.ac.in/vlabs-dev/labs/dblab/labs/index.php</a></li> </ul> </li> </ul> Assignment 1: Movie Database<br>1. Create a database with the name 'Movie'.<br>2. A 'Film' is a collection of documents with the following fields:<br>a. Film Id<br>b. Title of the film<br>c. Year of release | 3                               | CO1,CO2   |

|  |   |  |  |
|--|---|--|--|
|  | <p>d. Genre / Category (like adventure, action, sci-fi, romantic etc.) A film can belong to more than one genre.</p> <p>e. Actors (First name and Last name) A film can have more than one actor. A film can have more than one director.</p> <p>f. Release details (It consists of places of release, dates of release and rating of the film.)</p> <p>3. An 'Actor' is a collection of documents with the following fields:</p> <p>a. Actor Id<br/>First name</p> <p>c. Last Name</p> <p>d. Address (Street, City, State, Country, Pin-code)</p> <p>e. Contact Details (Email Id and Phone No)</p> <p>f. Age of an actor.</p> <p>Queries:</p> <p>1. Insert at least 10 documents in the collection Film _</p> <p>a. Insert at least one document with film belonging to two genres.</p> <p>b. Insert at least one document with film that is released at more than one place and on two different dates.</p> <p>c. Insert at least three documents with the films released in the same year.</p> <p>d. Insert at least two documents with the films directed by one director.</p> <p>e. Insert at least two documents with films those are acted by a pair 'Madhuri Dixit' and 'Shahrukh Khan'.</p> <p>2. Insert at least 10 documents in the collection Actor. Make sure, you are inserting the names of actors who have acted in films, given in the 'Film' collection.</p> <p>3. Display all the documents inserted in both the collectAdd a value to the rating of the film whose title starts with 'T'.</p> <p>4. Add an actor named "_ " in the 'Actor' collection. Also add the details of the film in 'Film' collection in which this actor has acted in.</p> <p>5. Delete the film " " .</p> <p>6. Delete all actors from an 'Actor' collection who have age greater than &gt;60</p> <p>7. Update the actor's address where Actor Id is" __"</p> <p>Assignment 2: Model the following Book system as document database</p> <p>Consider Set of books and publishers. Publisher can publish more than one book Book( Book name, Cost, Author, Published Year, Number of Pages)<br/>Publisher(name, language, books, city)</p> <p>Queries:</p> <p>a. List all the publishers located in mumbai</p> <p>b. List all the book having pages&gt; 500</p> <p>c. List all the books having cost 500</p> <p>d. List all the books published in year 2020</p> <p>e. List all the books written by "_ " and published in 2020</p> |  |  |
|--|---|--|--|

|  |  |  |  |
|--|--|--|--|
|  | <p>f. List the books published in english language<br/>g. List the book published in marathi language</p> <p>Assignment 3:<br/>Model the following hospital database as document database Consider the hospitals in and around pune.Each hospital may have one or more specializations like pediatric, gynac, ortho.A person can recommend or provide review for a hospital. One doctor can be associated with more than one hospital.</p> <p>Queries:<br/>a. List the names of the hospitals with __ specialization<br/>b. List the names of doctors visiting to birla hospital on monday<br/>c. List the multispeciality hospitals<br/>d. List the names of hospitals having rating &gt;=4<br/>e. List the doctors who are specialized in ortho<br/>f. List the persons who have given ratings to sahyadri hospital</p> <p><b>Neo 4J Practical</b><br/>Assignment 3: Song Database<br/>Consider a Song database, with labels as Artists, Song, Recording_company, Recoding_studio, song author etc.<br/>Relationships can be as follows<br/>Artist → [Performs] → Song →[Written by] → Song_author.<br/>Song → [Recorded in ] → Recording Studio →[managed by] → recordingCompany Recording Company → [Finances] → Song<br/>You may add more labels and relationship and their properties, as per assumptions.<br/>a) List the names of songs written by “:.....”<br/>b) List the names of the songs recorded in”...”<br/>c) List the names of record companies who have financed for the song “ ....”<br/>d) List the names of artist performing the song “.....”<br/>e) Name the songs recorded by the studio “ .....”<br/>f) List the names of artists who have sung only songs written by “ ”<br/>g) List the names of artists who have sung the maximum number of songs recorded by “.....” studio</p> <p><b>Assignment 4: Employee database</b><br/>Consider an employee database, with a minimal set of labels as follows Employee: denotes a person as an employee of the organization Department: denotes the different departments, in which employees work. Skillset: A list of skills acquired by an employee Projects: A list of projects in which an employee works. A minimal set of relationships can be as follows:<br/>Works_in :employee works in a department<br/>Has_acquired: employee has acquired a skill<br/>Assigned_to : employee assigned to a project</p> |  |  |

### Semester- III

**Course Type: Major Mandatory Paper 3(Theory)**  
**Course Code: DSC63103 Course Title: - Cloud Computing**

|   |                          |                               |   |
|---|--------------------------|-------------------------------|---|
| <b>Teaching Scheme:</b><br>2 Hours / Week | <b>No. of Credits:</b> 2 | <b>No. of Lectures:</b><br>30 | <b>Examination Scheme:</b><br>CIE: 20 Marks ESE: 30 Marks |
|---|--------------------------|-------------------------------|---|

**Prerequisites: Student should have basic knowledge of:**

- Operating System concepts
- Fundamentals of Computer Networks
- Good Understanding of Object-Oriented Programming Concepts

**The main objectives of this course are to:**

- To understand the principles and paradigm of Cloud Computing
- To appreciate the role of Virtualization Technologies
- Ability to design and deploy Cloud Infrastructure
- Understand cloud security issues and solutions

**Expected Course Outcomes:**

**On the successful completion of the course, student will be able to:**

|     |   |          |
|-----|---|----------|
| CO1 | Appreciate the need for cloud computing and make decisions on using specific cloud service type and deployment models | B1,B2,B4 |
| CO2 | Identify virtualization technologies of a cloud platform.   | B3,B5,B6 |
| CO3 | Make choices on selection of appropriate cloud service based on application requirements.                             |          |

**B1 - Remember; B2 - Understand; B3 - Apply; B4 - Analyze; B5 - Evaluate; B6- Create**

| UNIT     | Contents   | No of Lectures | CO targeted |
|----------|--|----------------|-------------|
| <b>1</b> | <b>Introduction to Cloud Computing</b> <ul style="list-style-type: none"> <li>• Overview, Layers and Types of Cloud</li> <li>• Desired Features of a Cloud</li> <li>• Benefits and Disadvantages of Cloud Computing</li> </ul> | 8              | CO1         |

| <ul style="list-style-type: none"> <li>• Understand the research and research project.</li> <li>• Understand how to publish paper in conference.</li> </ul>   |  |                                      |  |
| <b>Expected Course Outcomes:</b>  |  |                                      |  |
| <b>On the successful completion of the course, student will be able to:</b>   |  |                                      |  |
| CO1   | Carry out a substantial research-based project   |                                      | B1,B2,B4   |
| CO2   | Analyze data and synthesize research findings  |                                      |  |
| CO3   | Report research findings in written and verbal forms   |                                      |  |
| CO4   | Publish research work in reputable journals, present at conferences or in recognized project competitions. |                                      | B3,B5,B6   |
| <b>B1 - Remember; B2 - Understand; B3 - Apply; B4 - Analyze; B5 - Evaluate; B6- Create</b>  |  |                                      |  |
| <b>Guidelines for Research Work</b>   |  |                                      |  |
| <p>Guidelines for Research Project Work</p> <p>1 Each student or group of students must submit a detailed project proposal outlining the research problem, objectives, methodology, and expected outcomes.</p> <p>2 A mentor will be assigned by college to each group of students to provide guidance and support throughout the research process as well as to do internal assessment.</p> <p>3 Students are required to conduct a thorough literature review to understand the current state of research in their chosen area.</p> <p>4 Students should execute the research plan outlined in their proposal, adhering to ethical guidelines and academic standards.</p> |  |                                      |  |

- 5 Proper documentation of the research process, including experimental setup, data collection methods, and analysis techniques, should be maintained
- 6 Upon completion of the research work, students must prepare a project report and are encouraged to publish their research work in reputed journals, present at conferences or in recognized project competitions to disseminate their findings.
- 8 Evaluation will be as per the University guidelines, based on the quality of the research work, adherence to the research plan, presentation skills, and contribution

| <b>Semester- IV</b>  |   |                       |
|--|---|-----------------------|
| <b>Course Type: Major Mandatory Paper 1 (Project)</b>  |   |                       |
| <b>Course Code: DSC64101 Course Title: - Full Time Industrial Training</b>   |   |                       |
| <b>No. of Credits:12</b>   | <b>Examination Scheme: CIE: 120 Marks</b>   | <b>ESE: 180 Marks</b> |
| <b>Prerequisites: Student should have basic knowledge of:</b>  |   |                       |
| <ul style="list-style-type: none"> <li>• Logic Development and Various Programming Languages and Soft Skills</li> </ul>  |   |                       |
| <b>The main objectives of this course are to:</b>  |   |                       |
| <ul style="list-style-type: none"> <li>• To provide students with an opportunity to apply theoretical knowledge gained throughout the program in a real-world industrial setting</li> <li>• To foster professional skills such as teamwork, communication, time management, and problem-solving in an industrial environment.</li> <li>• To expose students to the practices, technologies, and challenges prevalent in the IT industry or related sectors.</li> <li>• To enable students to gain hands-on experience by working on projects or tasks relevant to their field of study.</li> <li>• To facilitate networking opportunities with professionals in the industry, potentially leading to future career prospects.</li> </ul> |   |                       |
| <b>Expected Course Outcomes:</b>   |   |                       |
| <b>On the successful completion of the course, student will be able to:</b>  |   |                       |
| C01  | Apply theoretical concepts learned in the classroom to solve practical problems encountered in an industrial setting.               | B3                    |
| C02  | Demonstrate proficiency in using industry-standard tools, technologies, and methodologies relevant to their area of specialization. | B2                    |
| C03  | Apply analytical and problem-solving skills to address challenges encountered during the industrial training                        | B3, B5                |
| C04  | Collaborate effectively with team members to achieve project goals and objectives.  | B4                    |
| C05  | Manage time and resources efficiently to complete assigned tasks and projects within the stipulated timeframe.                      | B6                    |
| C06  | Prepare a comprehensive report documenting their experience, including project details, learnings, and reflections.                 | B1,B2                 |
| <b>B1 - Remember; B2 - Understand; B3 - Apply; B4 - Analyze; B5 - Evaluate; B6- Create</b>   |   |                       |
| <b>Guidelines for Full Time Industrial Training (IT)</b>   |   |                       |

|   |  |
|---|--|
| 1 | Students are required to secure an industrial/internship placement in any organization, institution, or IT industry relevant to their field of study.  |
| 2 | Students must submit the offer letter from the organization within two weeks of starting the industrial training/internship, detailing the terms and duration of the internship.   |
| 3 | Students must have to work full time in the organization as per their rules and regulations.   |
| 4 | A mentor will be assigned to each group of students to provide guidance and support throughout the internship period.  |
| 5 | The industrial training/ internship duration should span a minimum of 360 hours, equivalent to 12 credits.   |
| 6 | Students may be assigned specific projects or tasks or assignments by the host organization, relevant to their area of specialization.   |
| 7 | Students should provide regular updates to their mentor through progress reports time to time regarding their progress, challenges faced, and lessons learned during the industrial training.  |
| 8 | Upon completion of the industrial training/ internship, students must submit a comprehensive report documenting their internship experience, including project/ assignment details, challenges and achievements as per the format specified. |
| 9 | Evaluation will be based on the quality content of the internship report, feedback from the host organization, and the overall performance during the internship/ industrial training period.  |

#### Evaluation Pattern

- Internal assessment will be carried by college guide/ mentor by continuous evaluation method.
- The final examination or presentation of the work carried during the training/internship period will be in front the panel of examiners as per the schedule given by College.
- There will be a panel of three examiners for the final assessment
  1. Industry expert (Appointed by the college)
  2. Academic expert (Appointed by the College)
  3. College guide/Mentor of the student as an internal examiner

| Parameters for Evaluation   | Marks |
|---|-------|
| Internal Assessment by Mentor Regular updates(30 Marks)<br>Timely report submission and deliverable (30 Marks)<br>Professional Conduct, Learning and Skill Development (30 Marks)<br>Work Undertaken and Learning Outcomes (30 Marks)   | 120   |
| External Assessment by Industry expert and Academic expert.   | 180   |
| Relevance and significance of the project or tasks undertaken (40 Marks)<br>Technical proficiency demonstrated during the internship (40 Marks)<br>Communication skills and presentation of the internship experience (20 Marks)<br>Work Undertaken and Quality of the internship report (40 Marks) Overall performance and contribution to the organization (40 Marks) |       |
| Total Assessment  | 300   |

|  |  |                      |
|--|--|----------------------|
| <b>Semester- IV</b>  |  |                      |
| <b>Course Type: Major Mandatory Paper 2(Practical)</b>   |  |                      |
| <b>Course Code: DSC64202 Course Title: - MOOC/Online Courses</b>   |  |                      |
| <b>No. of Credits:04</b>   | <b>Examination Scheme: CIE: 40 Marks</b>   | <b>ESE: 60 Marks</b> |
| <b>Prerequisites: Student should have basic knowledge of:</b>  |  |                      |
| <ul style="list-style-type: none"> <li>• Logic Development and Various Programming Languages and Soft Skills</li> </ul>  |  |                      |

**B1** - Remember; **B2** - Understand; **B3** - Apply; **B4** - Analyze; **B5** - Evaluate; **B6** - Create

**Guidelines for Industrial Project design**

**Formatting:** Use a standard font size (e.g., 12), 1.5 line spacing between headings and body text, and a single tab for new paragraphs.

**Margins and Page Size:** Maintain margins and use A4 size paper for your project documentation.

**Content Structure:** Include essential sections such as the title page, abstract, table of contents, list of figures, list of tables, acknowledgments, and references.

**Project Report Format:** Ensure the report follows a structured format, including chapters for introduction, background, work carried out, experimental results, conclusion, and future scope.

**Documentation Importance:** Effective project documentation is crucial for project management, ensuring communication, decision-making, and continuity.
